No. 17 - March 1958

Above is shown a sketch of the space ship in which R.O. Schmidt rode in near Kearney, Nebr. We thought you might like a print of this ship as described in his talk in Kalamazoo on Feb. 28th. This space craft evidently is an instrument ship of some sort because of the great amount of instruments it carries. The areas marked (?) were not described to Mr. Schmidt nor were the purpose of the fans told. The bulkheads had no visible openings and were not transparent.

We also thought that you would like a photo of our speakers when not in such a serious mood as normally seen on the speakers platform.

Do you remember the three questions asked of Mr. Schmidt by the occupants of the craft? If not, they were as follows:
1. What would U.S. do if other planets were to start sputnicks or satellites flying around the earth interrupting all TV, radio and a lot of other devices? Also the atomic bombs?
2. What was the airplane carrying that disintegrated over the Pacific Ocean, besides passengers in November?
3. How would the people react, if a fleet of these ships would land and talk to all people on a friendly mission? Would they accept us in friendly terms?...Mr. Schmidt would like to hear from all of you. Mr. Reinhold Schmidt, 1715 Gage St., Bakersfield, Calif.

"A FALLING OUT" WITH "THE FALL OUT"

We are on that road leading to the end of the earth. Here in America, the "fallout" from exploded atomic bomb tests grows daily over our cities and farms. An invisible blanket of strontium 90 is descending daily upon mankind. According to the unimpeachable Bulletin of The Atomic Scientist..... "accidental radiation cases indicate that fallout has already caused blood cancer, bone cancer, genetic deviation and complete sterility".

Already the U.S. and the Soviet Union have stock piled enough super bombs to obliterate the earth. Why continue testing bombs whose fallouts may destroy mankind?

We as a free thinking, democratic people say that it has gone far enough. THERE MUST BE AN END TO IT!

Radiation contaminated grass can transfer the strontium 90 into the system of dairy cows thus creating a calcium deficiency in bones. Doses of radiation in the air, can fall on all the fruits and vegetables we eat daily, yet we have to eat to live. Don't we want to live so that we can live to be able to eat uncontaminated foods?

The children in each generation are the sufferers, far more likely than their elders, to pick up the deadly product of the bomb.

President Eisenhower has tried to negotiate a test ban with the Soviet Union. Where and when will it end? "The final decision regarding the testing and development of more powerful nuclear devices rests with the people", said Dr. Edward Teller, Professor of Applied Physics at the University of California, and the man who is credited of the development of the Hydrogen bomb.

Scientific judgement that the amount of radioactive material injected into the stratosphere should not exceed ten megatons a year. Significantly, this information came from the lower echelon scientists connected with the Atomic Energy Commission. The question now arises; what values is the commission using in its official safety standard /? The Congress and the PUBLIC have not been told about this important information. Secretary of State Dulles, announced a month or two ago....the U.S. bomb tests would involve only a small fraction of what was considered a DANGEROUS level. But what fraction? And what IS a harmful level? THESE FACTS WERE REVEALED. Why should the official government agency charged with full responsibility in the atomic energy field, keep the American people in the dark?.

This 's what some of the important men in the AEC state. Former AEC Commissioner Murray says, "Strontium 90 hazard is a real danger."

Dr. Linus Pauling, Nobel prize winning Bio-chemist says, "There is no safe amount of radiation."

Albert Schweitzer, Dr. Robert Oppenheimer, and other humanitarians, have been acting as judge and jury of its own cause.

These are some of the viewpoints of some well informed men, as expressed in an article, which appeared in the current (Feb.- Mar.) issue of 'Truth' Magazine.

We, as the people, have to literally squeeze the information out of the AEC. Even the men directly connected with the nuclear program contradict each other, on their points of view, concerning the dangers, or no dangers of radiation. WHAT ARE WE TO BELIEVE? Even skillful newspaper reporters, not to mention the layman on the outside, have difficulty in piecing together the information or understanding its significance. So much double talk.... and jabber-de-wock, that we are kept in the dark legally.

Who is behind all the SECRECY? Have we lost our democratic right to know WHAT is going on in our country? Are there a special few who will dictate to us what we can or cannot know about these atomic tests?

How can we help to clear up this maze of confusion and obtain a clearer perspective on this vital subject of nuclear fallout? YOU can write courteous and intelligent letters to your local Congressman, Senator, and representatives, and urge them to stop these atomic tests. Written on the 'Fact Sheet', is the correct method to do this. Ask them also, that when the House Resolutions Bill No. 9901 comes up for vote, that they amend this Bill to include this phrase.....

That they put a stop to our atomic testing, and that they further their studies on interplanetary relations. Also to stop the SECRECY on the U.F.O.'s. If enough letters reach these men, and they can be made to realize the seriousness of it, only good results will follow.

NEW ADDITIONS TO TAPE LIBRARY

May we remind you of our tape library lending and program service? If you have missed a program or wish to hear one over again, contact Bob and make arrangements. Newest additions are: Aho-Schmidt - Feb. 28, 1958, and Mike Wallace-Keyhoe Interview - Mar. 16, 1958

The INTERPLANETARY Foundation
30050 MARSHALL Royal Oak, Michigan.
U.S.A. — Earth

NEXT MEETING * MARCH 28th.

Our program will consist of a general discussion of several vital aspects of the group's organizational policies, future programing, Mr. Schmidt's three questions, the next Federation convention and the latest news. The meeting will be held at the Crosstown Parkway Branch of the First National Bank at 8:00 P.M. Friday the 28th.

Thanks to all in the Study Group [REDACTED] exceptionally fine hospitality shown us in Kalamazoo. It helps [REDACTED] more worth while to know fine people like you. Wayne S. Aho

We need representation in Washington. We need NICAP! NICAP needs our support! Write National Investigations Committee on Aerial Phenomena, 1536 Connecticut Ave., Washington 6, D.C. for further information about this non-profit organization offering memberships and publications giving authenticated UFO sightings and up-to-date developments about Unidentified Flying Objects. NICAP'S director is Major Donald E. Keyhoe, ret.

NEW BOOKS ADDED TO OUR LIBRARY

The Expanding Case for the UFO - M. K. Jessup
The Flying Saucer Conspiracy - Major Donald E. Keyhoe
Inside the Space Ships - George Adamski

RESEARCHERS ATTENTION!!!

Have you tried 7:00 A.M. Drive-In-Banking at Crosstown Parkway?
Mention that you saw it advertised in the KFSSC Bulletin if you do.
